MEMORANDUM

To: Advarra IRB
Date: 1 October 2021
Re: Participant reimbursement for clinical trial visits

This is a non-protocol study document modification concerning participant reimbursement for clinical trial visits in SIREN studies.

For the BOOST-3 trial there is no payment for participation, but reimbursement for incidental costs of clinical trials visits such as travel, parking, nourishment, missed work, and costs respectful of the time and effort of the participant or caregivers, may be provided as per, and compliant with, the [SIREN Standard Operating Procedure - Participant Reimbursement](#), a copy of which is attached to this modification.

Respectfully submitted.
