HOBIT NEWS

Hyperbaric Oxygen Brain Injury Treatment Trial Newsletter

Reminder:

The next NETT/SIREN Study Coordinator Meeting is July 10th at 1pm EST

Way to go Hennepin

Hennepin is our first site to be released to enroll subjects! Big congrats to Hennepin!

Great job Duke

Duke has completed their simulation!

Thank you Maryland

Maryland has completed their simulation!

HOBIT Updates

New Documents in the HOBITTRIAL Toolbox

New Sim Video Checklist. Sites can use this checklist to work through the requirements of the simulation. The checklist also serves as the guide for HOBIT leadership when reviewing each sites' sim video. This is a great resource for those still needing to complete their sim.

Updated version of the Chamber and Subject Log. This document is used to record and correlate specific HOBIT clinical data with the pressure and time of the HOBIT subject's hyperbaric treatment. Instruction for this document will be added to the MOP.

CRF's in WebDCU

HOBIT CFR Study Book and Completion Guidelines have been added to WebDCU. These are located at here: webdcu.musc.edu — Toolbox — Project Documents.

Sim Upload

We have a new way for sites to upload simulation videos directly to mbox via the HOBIT website. Sites can access the video upload tab here: HOBITTRIAL.org — Video Upload
