HOBIT NEWS

Hyperbaric Oxygen Brain Injury Treatment Trial Newsletter

Reminders:

+The next NETT/ SIREN Study Coordinator Meeting is Oct 2 at 1pm EST

Cathy from Iowa will recap their 1st enrollment at their site and lessons learned.

Kentucky—Released to Enroll

Congratulations to Kentucky! Kentucky is now released to enroll! Great job and thank you for your hard work!

Scottsdale-Healthcare Osborn — cIRB Approved

Great job to Scottsdale-Healthcare Osborn on receiving cIRB approval from Advarra

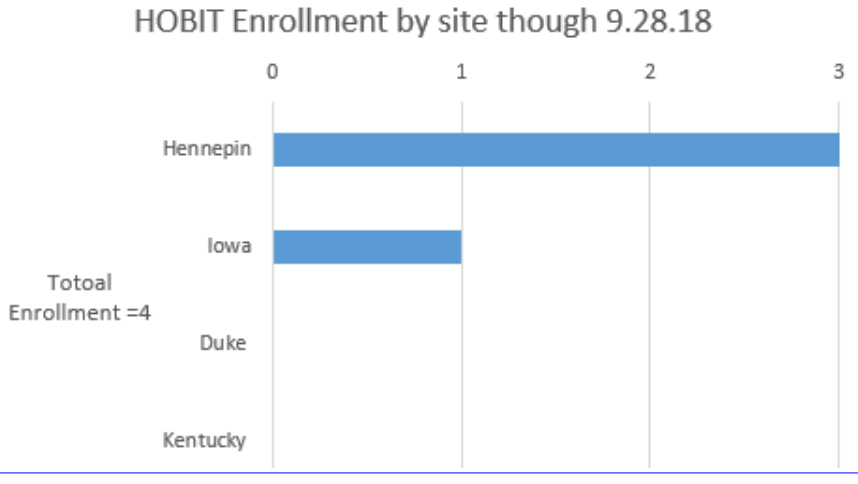
OSU — Sim Completed

Thank you to OSU for completing their simulation video

Spectrum — Local IRB Cede Review

Good job to Spectrum on completing the local IRB cede review

We currently have 4 sites open to enrollment: Hennepin, Iowa, Duke, & Kentucky



HOBIT Updates

Resources available for HOBIT

Writing a good SAE Narrative

Please check out the presentation by Dr. Silbergleit on how to write a good SAE narrative, available on the NETT/SIREN Presentation page:

https://nett.umich.edu/sites/default/files/docs/how_to_write_good_saes.pdf

Eric Jaton (Minnesota) wanted to share a resource he finds helpful to calculate GCS and Serum Osmolatlity for HOBIT: MDCalc. This link is also posted in the Toolbox under Clinical Resources.

MOP Updates

We've made some important updates to the MOP, details below:

Section 3.9. If critical hypotension occurs during the first 5 days of treatment, all episodes should be recorded as one SAE. The start time is the time of the first occurrence of critical hypotension and the end time is when the critical hypotension finally resolved.

If critical decreased CPP occurs during the first 5 days of treatment, all episodes of critical decrease in CPP should be recorded as one SAE. The start time is the time of the first occurrence of critical decrease in CPP and the end time is when the decrease in CPP finally resolved.
