NETT/SIREN Steering Committee Call
May 27th at 12pm ET

NETT/SIREN Study Coordinator Call

EFIC Milestone 1 Reached!

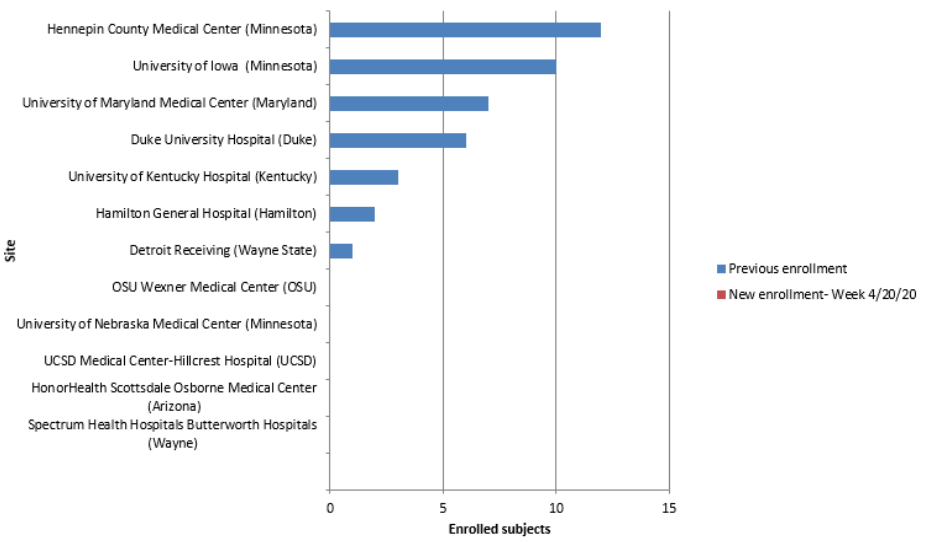

Congratulations to...

Iowa
Kentucky
UCSD

Detroit Receiving

for completing Milestone 1
EFIC activities!!

HOBIT Enrollment Status: April 20 - 26, 2020

HOBIT Updates

Retraining Requirements

During this time of restrictions on research, retraining will still be required after 6 months without an enrollment, or 6 months from last retraining, for the Research Team only. Those listed on the eDOA will be required to complete retraining activities.

Clinical Teams will not be required to complete retraining until the restrictions to enrollment is anticipated to be lifted at your site. Please keep us apprised of any changes in your status.

You will receive notification from the CCC when re-training is required.

EFIC Updates

Steady progress is being made toward EFIC readiness at several sites. The efforts at Iowa, Kentucky, UC San Diego and Detroit Receiving in reaching Milestone 1 are much appreciated!

All sites should be entering proposed Community Consultation and Public Disclosure events in WebDCU, even if you are not able to conduct them at this time. This enables us to review and provide guidance throughout the process, if needed.

For ideas about doing Community Consultation under current restrictions, please see the Specific EFIC Related Ideas During COVID 19 - Supplement

We have had calls with a number of sites to discuss barriers to progress on EFIC and have learned of the challenges you are facing. In some cases, institutions have imposed a hold on ALL research activities. Where possible, we encourage you to do whatever you can to reach your EFIC ready goals—even small steps. As always we are here to help—don't hesitate to contact us!

Remember, the [HOBIT Milestone Document](#) is a good reference for all EFIC start-up activities and tasks

Be Creative!!
