

## REMINDERS

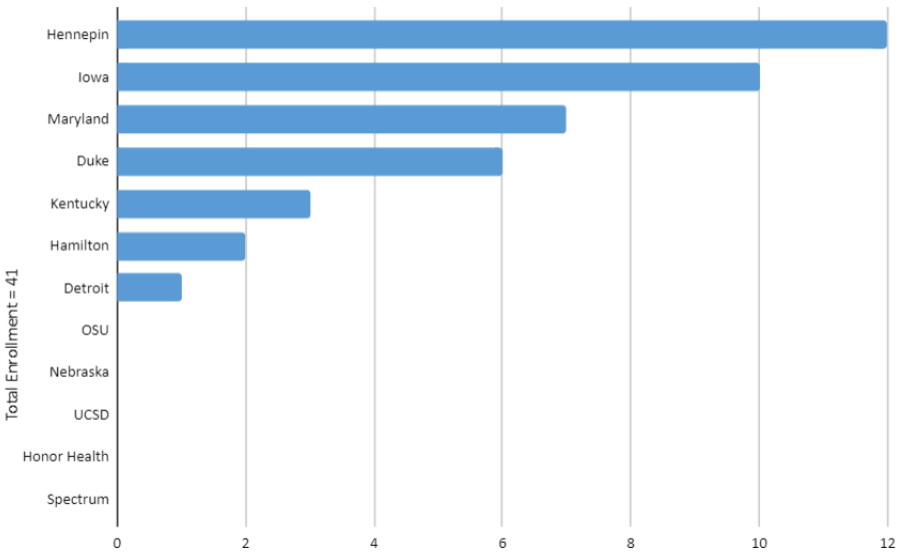

**NETT/SIREN Steering Committee Call**  
May 27 at 12pm ET

**Study Coordinator Call**  
June 2 at 1pm ET

Great job to the **University of Maryland** and the **University of Iowa** for making progress toward EFIC readiness by completing events!

Congratulations to the **University of Kentucky** who has completed a number of CC and PD activities and is now under final EFIC review at the CCC!

HOBIT Enrollment by site through 5/22/2020

## HOBIT UPDATES

### RSDV - No better time than now!

Does your site allow for remote access to the eMR for monitoring purposes? Site eMR systems can now be accessed remotely in a safe way. Health Systems may be motivated during this time to consider new processes that will allow for Remote Source Data Verification or RSDV.

Please help us by responding to the coming email from the CCC regarding RSDV.

### GOALS FOR EFIC - Its time to set them!

Please help us reach our goal at the CCC, to have every enrolling site reach Milestone 1 by July 1st. This means the plan for Community Consultation and Public Disclosure events needs to be entered in WebDCU and approved by the CCC.

We are asking that each site notify the CCC of the estimated date for when your EFIC activities will be complete. Make modifications to your plan to include events that can be done during social distancing and start scheduling!

We continue to update our supplemental EFIC guidance document with specific examples to help sites operationalize remote or virtual events. Here is the [link](#) for your immediate reference.

### RE-TRAINING IS STILL REQUIRED

If it has been 6 months since your last enrollment (or last re-training) the Research Team must complete re-training. This includes all team members listed on the eDOA. Clinical team re-training will be required when a site resumes enrollment, post-covid. You will receive notification from the CCC if you are due for re-training.
