

## Financial Conflict of Interest

### Procedure Overview

To define guidelines for identifying financial conflicts of interests (FCOI) during the preparation of grant submissions when collaborating with the NETT.

### Responsible Individuals

Collaborating Investigators, NETT Executive Committee.

### Procedure

1. Financial conflicts of interest that meet either the investigator's institutional or NIH reporting criteria must be reported to the NETT Executive Committee.
2. Collaborating investigators must disclose the FCOI to the NETT Executive Committee prior to or concurrent with submission of the NETT Clinical Trial Submission form.
3. Changes to existing, new or potential FCOI must be reported to the NETT Executive Committee (EC) upon the investigator becoming aware of their existence.
4. Investigators must provide a copy of his/her institution's financial conflict of interest management plan to the NETT EC, and documentation that the plan has been submitted to NINDS as required by 42 CFR 50 Subpart F to the NETT Executive Committee.
5. FCOI will be shared with NETT Hub Complex investigators. The FCOI management plan will be shared with NETT Hub Complex investigators upon request. The management plan will be sent to those PI's who request it by U.S. mail and the copy of the plan will be labeled for their use only.
6. Reporting financial interests to the NETT Executive Committee does not replace the need to comply with NIH Financial COI Requirements (<http://grants.nih.gov/grants/guide/notice-files/NOT-OD-05-013.html>), or the requirements set forth in 42 CFR 50 Subpart F and 45 CFR Part 94.
