Patient Info

Press the Patient Info or Protocol area to view or change relevant information.

Review Data

Press **Freeze** button. Then use left and right arrows, or Go To Time button to review data. Press **Unfreeze** to return to active displays.

Alarms, Alerts

Press the Alarms or Alerts area when lighted to learn about triggered events.

Protocol Steps

Press any button to slide out menu. Select desired Step. Fixed protocol steps include Setup and Stop Monitoring.

Change Settings

Press display area (numeric, trend, waveform). Then press **Edit Selected** to change measurement, time interval, etc.

Main Display

Press to return to the selected Main Display.

Time Line

Time and date display area

View Displays

Press the button for the desired display screen. These buttons will change depending on the Step.

Main Menu

Press for device and measurement status and for system settings.

EEG Config

Press to set up and check EEG connections, impedance, artifact, and video.

Snapshot

Press to Save a screenshot of the current screen. Press to View all saved screenshots.

Mark Event

Press to mark significant clinical events.
Select an Event Category and Event Name from the drop down menu; then verify or change the event name and time. Press **OK**. Otherwise, choose Enter Event Name to type in the event.
