

Protocol Assist Device Experience Survey

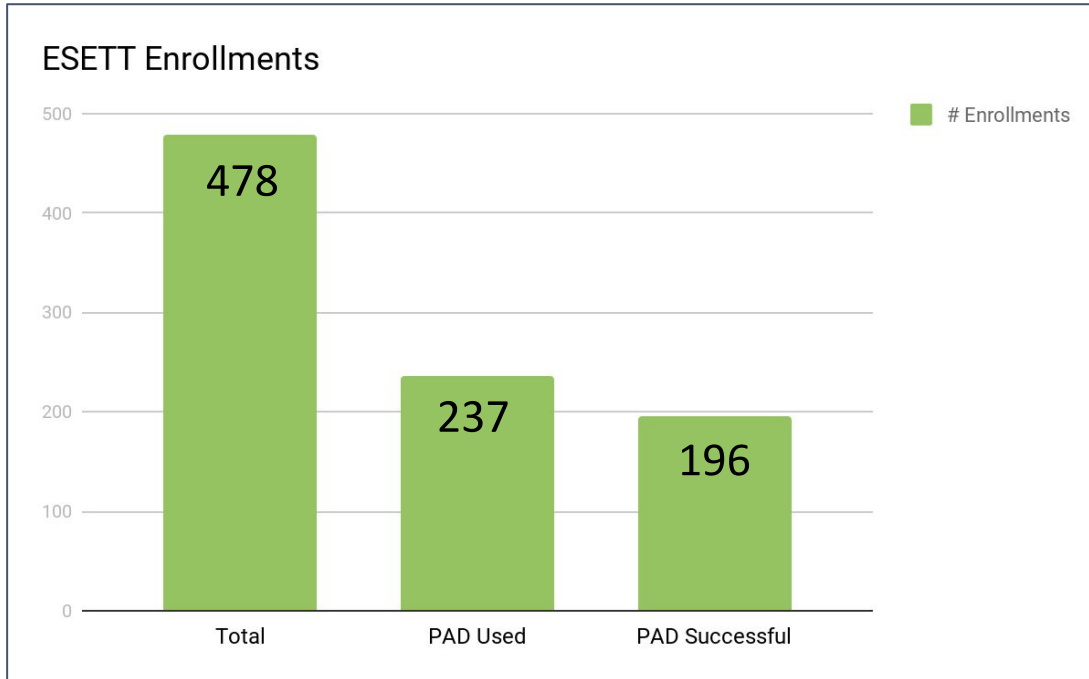

**Established
Status
Epilepticus
Treatment
Trial**

Lindsey Harris, Research Technician Associate

By the numbers

- PAD had an 82.7% success rate!
-

Why use the PAD?

1. Time sensitive nature of treatment protocol
2. Need to update patient status in real time
3. Ensure timely assessments
4. Provide protocol reminders as needed
5. Additional source for data verification

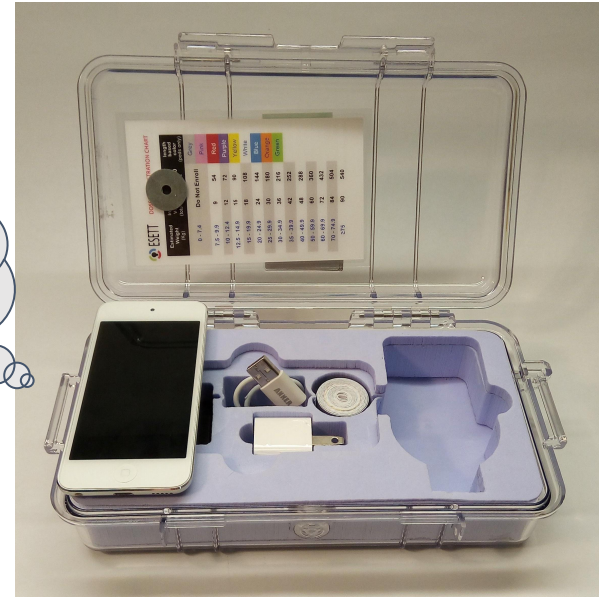

What to do with this data?

- We're developing a review of the PAD which will include
 - User experience feedback
 - Analysis of protocol deviations from PAD vs. non-PAD enrollments
- We want to hear about your experience with the PAD!

Who is this survey for?

- Anyone who used the PAD!
- Investigators
- Clinicians
- Pharmacists
- Nurses

Link to online version will be provided. Please distribute to your study teams and share with hospital staff.
